Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15-20 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. The term "co current" (claim 15, line 7) is deemed to be a typographical error which renders this claim indefinite. Claims 16-20 depend from claim 15, and are therefore also indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Stevenson (U.S. Patent No. 3,682,312). The reference discloses a device comprising all of the structural elements and structural interrelationships recited in the claims (see col. 2, lines 12-13 and 36-37; and col. 3, lines 25-27 and 37-38); and this device is inherently capable of being employed

Art Unit: 1724

in the recited manner. Applicant should note that the manner in which a device is intended to be operated (i.e. fluidizing the desorber bed) is not a structural limitation, and hence cannot be relied upon to patentably distinguish apparatus claims 1-14. It is well settled that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Claims 15-20 would be allowed if rewritten or amended to overcome the above rejection under 35 U.S.C. § 112.

Higgins (U.S. Patent No. 3,492,092) and Arion (U.S. Patent No. 3,969,243) disclose similar continuous ion exchange resin systems.
